## How to Connect to SOU-Wireless (Windows)

David Raco - 2021-08-19 - Comments (0) - Windows

SOU has recently updated the Wi-Fi options available for faculty, staff, and students.

Note: SOU Employees using SOU equipment should be using SOU-Secure. Contact your computing coordinator if you have questions about which network to connect to.

This guide will cover SOU-Guest and SOU-Wireless. In short, SOU-Guest will not require you to log in, while SOU-Wireless will.

**SOU-Guest** is the preferred Wi-Fi for mobile devices such as phones due to not having to authenticate. It has a 20Mbps bandwidth limit, and will allow you to reach publicly facing web servers.

**SOU-Wireless** requires you to authenticate each day you are on campus. It doesn't have an imposed bandwidth limit, and will let you access much of the internal SOU network.

## How to connect on a Windows computer:

To connect to a Wi-Fi network through the taskbar, use these steps:

- Click the Network icon in the bottom-right corner of the taskbar.
   Quick note: Alternatively, you can open Action Center (Windows key + A), and then click the Network button in the Quick actions section to access the network flyout. If you don't see the button, click the up arrow button on the left.
- 2. Select the wireless network to connect.
- 3. (Optional) Check the **Connect automatically** option.
- 4. Click the **Connect** button.

Quick tip: If you do not see any wireless access point in the list, click the Wi-Fi button to turn on the adapter.

## Authenticating to SOU-Wireless:

A Portal Login window will open when you select SOU-Wireless, and ask for a username and password. Enter your SOU school username and password (do not put the @sou.edu from your email address):

Upon successful authentication you will see the following screen. You can click the redirect,

or wait for it to happen automatically:

You will now be able to use the network at SOU.
