Recommended Anti-Virus for Windows

Brad Christ - 2017-09-02 - Comments (0) - Windows

For students and home users, we recommend using Microsoft Security Essentials for a Windows anti-virus solution.

It's free for home users. Download Microsoft Security Essentials from their site: http://windows.microsoft.com/en-US/windows/products/security-essentials

University-owned laptops and desktops are already installed with Microsoft Forefront, the commercial version of Security Essentials.
