Adding and Removing LDAP Management

Michael Wagner - 2017-09-02 - [Comments (0)](#) - [Voicemail](#)

Converting a non-LDAP managed account into a LDAP managed voicemail account

1. From the **Identification** page, change the Groups to "ldap_imports"
2. Select the "LDAP managed" check box

3. Click on the **Contact Information** tab on the left
4. Set the **IM Account** to the user's username

5. Click on the **Domain** tab
6. Set the **Domain** to "home.ad1.sou.edu"
