

All Users: Customize Your Dashboard

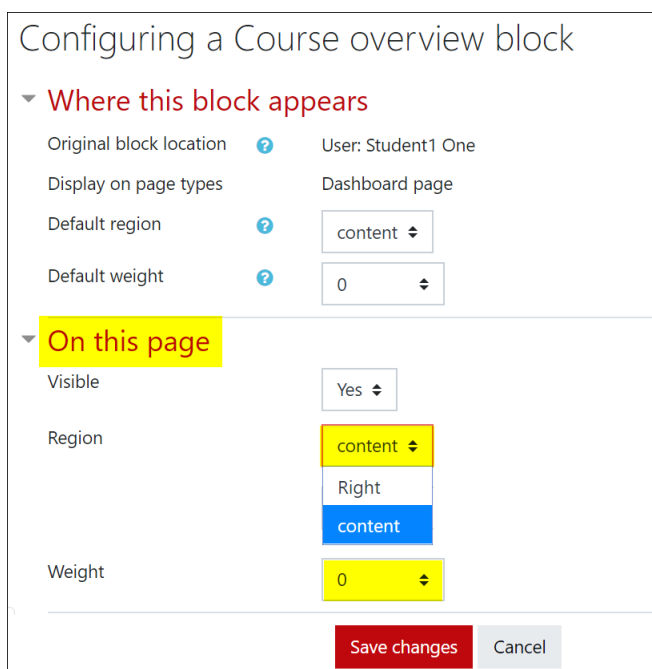

Hart Wilson - 2019-07-17 - 0 Comments - in Moodle

To rearrange the blocks on your dashboard page, click on the **Customize this page** button in the upper right corner. With customizing activated, you'll see controls in the upper right corner of each block:

If you want to keep the block in the same area, but move it to a different location, use the **Move** icon circled here in green. To move it to the side panel, click on the **Actions menu** icon highlighted in blue and select **Configure block**.

In the block configuration window, use the pull-down menu in the **On this page** area to change the current location (what Moodle calls "region") — "content" denotes the central portion of your page, while "Right" indicates the right column. You can use the **Weight** field to indicate where on the page you'd like the block to appear or use the move icon to drag and drop it after you save your changes.

Click on **Stop customizing this page** when you're done rearranging blocks; click **Reset page to default** to start over.
