

## Email List Moderation

Jesse Martinich - 2025-06-18 - Comments (0) - Google Apps

### Overview

If you have been designated as the moderator of an email group, you will receive a notice of a "Message pending" each time an email is sent to the group.

The email will contain a link that says "approve or reject". This link will take you to the screen shown below, where you can select a moderation action.

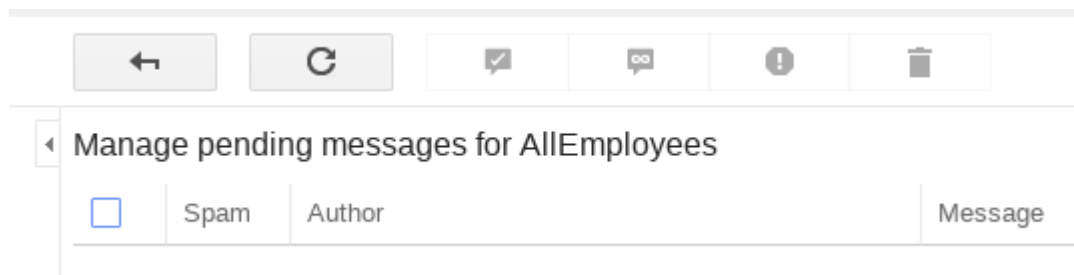

### Approve or deny pending posts

You can approve or deny posts before they appear to the group. If posts aren't approved within 7 days, they'll be deleted.

1. To read a post, click the title.
2. Check the box next to the post.
3. At the top of the screen, select an option (buttons shown in context below):
  - To approve the message, click Post .
  - To approve the post and automatically approve all future posts by that author, click Trust .
  - To ban the author or authors from the forum and report the message as spam, click Spam .

- To block the post, click Remove .

## Moderate pending posts without an email link

1. Sign in to [Google Groups](#).
2. Click My Groups.
3. Choose a group.
4. Near the top right, click Settings  > Manage messages.
5. Follow the instructions above.

## Update Rejection Notice

When you reject an email, G Suite sends the rejection text that is saved. You can customize the text by opening the Settings menu on the left and clicking "Moderation".

After you update the text, you will need to click "Save" at the top of the screen.

Moderate messages

- ☒ Moderate all messages to the group.
- ☒ Moderate messages from non-members of the group.

New member restrictions

Restrictions can be removed individually for each new member in [member management](#).

No posting restriction for new members

Rejected author notification

- ☒ Notify authors when moderators reject their posts.

Your message has been rejected by the moderators of SOU Recruitment.

Spam messages

How should suspected spam messages be handled?

Send them to the moderation queue and send notification to moderators
