Faculty: Adjust Scores in Quizzes

Hart Wilson - 2018-10-16 - Comments (0) - Faculty

You may find that you need to adjust scores on quizzes in Moodle because:

- The wrong choice was selected as the correct answer.
- A question turns out to have multiple correct answers.
- A question was not clearly stated.
- (*On rare occasions*) A student's attempt was submitted as time expired, resulting in some answers not being credited in the final score.

You can adjust quiz scores individually or for all students at once. This **guide** will show you how to designate a different answer as correct in a quiz as well as how to award credit to an individual student for a response.
