

Faculty: Create a Rubric (Advanced Grading)

Hart Wilson - 2020-04-15 - Comments (0) - Faculty

"Advanced grading" allows us to create rubrics for grading assignments. This video does a good job of providing an overview of how to create and use a rubric.

Two things to know:

- If you want students to see the rubric before they complete an assignment, you can make it available to them.
- Points may be calculated a little differently than you expect. Mary Cooch recommends reviewing [this related documentation](#) at Moodle.org for a comprehensive explanation. The important thing to know is that one level of the rubric needs to be set for zero points in order for the scores to be calculated correctly.

It's now possible to duplicate a row in your rubric, then update the wording as needed. If your rubric has similar language for several criteria, this may save you some keystrokes.

Note: This duplicate feature does not yet work on marking guides or advanced grading checklists.

Current rubric status READY FOR USE

Rubric

✗ Clarity of argument Duplicate criterion	No contribution made or contribution(s) completely off-topic. <i>0 points</i>	Point of view not very clearly stated; logic lacking. <i>1 points</i>	Some points are clear, but logic is inconsistent. <i>2 points</i>	Point of view logical and clearly expressed. <i>3 points</i>	+ Add level
✗ Understanding of primary issues	No contribution made or contribution(s) completely off-topic. <i>0 points</i>	Misses the main point; responses vague and unsubstantiated. <i>1 points</i>	Hits some of the main points, but misses others. <i>2 points</i>	Expresses solid understanding of significant issues. <i>3 points</i>	+ Add level

+ Add criterion

See [these instructions for reusing a rubric](#) to grade another assignment or forum.
