

Faculty: Create an Announcement

Hart Wilson - 2023-12-21 - [Comments \(0\)](#) - [Faculty](#)

The **Announcements** feature in the **General** section at the top of the page is a one-way forum for instructors to post class announcements such as reminders about class sessions and notifications about changes in plan. By default, all class participants are subscribed to this forum, which means that they will receive a copy of each announcement via email—even if the course has not yet been made available to students. Messages will remain posted in the **Announcements** link throughout the term and the five most recent announcements will be displayed in the “Latest news” block in the right column. Note that there is a **15-minute delay** on sending out these posts, so you won't see a copy of an announcement in your in-box for a little while.

While we recommend using **Announcements** for posting a welcome message for your students, you may prefer to welcome them in a textbox (for a shorter announcement) or in a web page (for a longer announcement). Instructions for creating messages in textboxes and web pages are found below.

Important Features

- Although Moodle considers this feature a forum, it is not a true discussion forum—only the instructor can post messages to it and students may not reply in it.
- Do not attempt to use the **Announcements** feature as a discussion forum, as students will not be able to post replies in it.
- By default, all course users are subscribed to this forum; students may not “opt out” of being subscribed to it unless you change the subscription mode (not recommended).

Post an Announcement

A common error with this feature is to begin by clicking on the edit icon. Don't do it! You need to open the link in order to create an announcement.

1. Click on **Announcements** to open the link.
2. Click on the **Add discussion topic** link.
3. Enter a subject line and message.

Click on **Post to forum** to send a simple message or click on **Advanced** to attach a file or take advantage of other options described below .

The screenshot displays the 'Announcements' section of a software interface. At the top, there is a header bar with an 'Announcements' icon and title. Below this is a navigation menu with options: Forum, Settings, Advanced grading, Subscriptions, Reports, and More. The 'Forum' tab is selected. The main content area shows 'General news and announcements' with a search bar and a red 'Add discussion topic' button. Below this, a message is being composed. The 'Subject' field is highlighted in yellow. The 'Message' field is a large text area with a rich text editor toolbar above it. At the bottom of the message composition area, there are three buttons: 'Post to forum', 'Cancel', and 'Advanced'. The 'Advanced' button is highlighted with a blue border. Red curved arrows indicate the workflow: from the 'Announcements' header to the 'Add discussion topic' button, then to the 'Subject' field, then to the 'Message' text area, and finally to the 'Advanced' button.

Advanced Options

- Drag and drop a file into the **file picker** to attach it to your message.
- **Pin** a message to always display it at the top of the list of Announcements.
- **Send** your announcement without the standard 15-minute editing window.
- Use the **Display period** options to **release** a message at a particular date and time and/or **remove** an announcement from the list beginning on a particular date and time. (Handy for drafting standard messages ahead of time and releasing them at key points of the term!)

Attachment Maximum file size: 100 MB, maximum number of files: 1

Deleting an Announcements Link

When you import a course from a prior term, its Announcements link will be copied over along with all the rest of the course content. ***The topmost Announcements link is the one you need to keep***—any other Announcement links should be deleted (turn editing on in your course and click the item’s edit link to select Delete).

If you try to delete all the Announcements links in your course, you’ll find that Moodle will create a new link the next time you open your course. If you do not plan to use this feature and want to remove it, open the **Edit** link associated with the Announcements link on the course main page and click on **Hide**. To remove the link entirely, click on **Settings** at the top of the page and open the **Appearance** options. In the **Number of announcements** field, select zero. Save changes. Now you can delete the Announcements link and it will stay deleted!

Inserting a Textbox as a Welcome Announcement

If you have a short welcome message and you'd like your students to see it whenever they access the course, you can enter your message in a textbox. (If you use a textbox, we recommend hiding it after the first week of class so that students don’t have to scroll past it to access course activities.)

1. With editing turned on, click on **Add an activity or resource** in the General area at the top of the course.
2. Select **Textbox**.
3. Enter your message in the textbox.
4. If desired, use the toolbar to apply formatting to your text.
5. You can safely ignore the **Restrict access** settings. If your course is set up

to allow **Completion tracking**, you may allow students to check off this resource when they have reviewed it.

6. Click on **Save and return to course**.

Posting a Welcome Announcement in a Web Page

Longer announcements can be posted in a web page with a title such as "Welcome Message." See [this article](#) for instructions on creating a web page.
