Faculty: Create Quizzes in Moodle

Hart Wilson - 2023-04-07 - Comments (0) - Faculty

New and improved guides to quizzes!

Let Moodle do the work! Once you set up a quiz, Moodle will deploy it when you wish, grade it, and record the scores in your grade book.

Find articles and guides to quizzes including quick guides for creating a test bank (adapting questions in a Word document to upload into Moodle, working with publisher files, and creating questions manually), creating a quiz shell (setting up the timing and other key deployment factors), and building the quiz itself (adding select or random questions to the quiz canvas).

This comprehensive guide contains step-by-step instructions for creating and deploying quizzes, including how to set up a quiz for a student needing extra time and how to administer proctored exams.

Need to grade a batch of essay or short answer questions in a quiz? These instructions will save you time and effort.

Contact the Center for Instructional Support staff for assistance in creating quizzes.
