

Faculty: "Discussion" Locking

Hart Wilson - 2018-01-13 - Comments (0) - Faculty

Moodle 3.2 introduces a discussion locking option for forums—but don't get too excited yet.... this does **not** mean that we can set due dates for posting to a forum. :-)

Discussion locking

Lock discussions after period of inactivity

If you enable the locking function, individual discussion **threads** will close down after a set period of inactivity—the forum as a whole will remain open to continued participation, but any **thread** that hasn't had a response made to it after that time will be shut off from new posts. The image at right shows what students would see once a discussion thread closes.

We don't recommend enabling this function unless you have a compelling need.
