Faculty: Embed a Web Link

Hart Wilson - 2018-01-16 - [Comments (0)](#) - [Faculty](#)

Moodle makes it easy to post an external link to your course page, but it's just as easy to include an external link in a web page (or book or assignment or.... basically in any text box). (Download this **guide to embedding links, files and videos**.)

To create a text link to an external web site in any Moodle text box:

1. Type in the text to which you want to link the web site. Make the text bold and underline it to make it stand out as a link.
2. Select the text you have just typed with your mouse.
3. In the toolbar, click on the icon with the chain links on it labeled **Insert/edit link**.
4. Enter or paste the URL of the target site in the **Link URL** field, including http://.
5. Add a title if desired (this will be displayed when a mouse hovers over it).
6. In the **Target** field, select "New window" from the pull-down menu.
7. Click on **Insert** to return to your text box. Save your changes!

Bonus Tip: Are your editing toolbars missing when you open an existing text box? **These instructions** will have you editing again in a hurry.
