

## Faculty: Prevent Backtracking in Quizzes

Hart Wilson - 2020-11-11 - Comments (0) - Faculty

To require students to move forward in a quiz one question at a time without being able to return and review previous questions, set the quiz **Layout** options as follows:

1. Click on **Show more...**.
2. Change the **New page** option to **Every question**.
3. Select **Sequential** from the **Navigation method** option pull-down menu.

The image shows two screenshots of the Moodle quiz 'Layout' settings. A red arrow points from the 'Show more...' button in the top screenshot to the expanded settings in the bottom screenshot.

**Top Screenshot:**

- Layout** (expanded)
- New page:** Every 5 questions (dropdown)
- ☐ Repaginate now
- Show more...** (button)

**Bottom Screenshot:**

- Layout** (expanded)
- New page:** Every question (dropdown)
- ☒ Repaginate now
- Navigation method:** Free (dropdown menu is open, showing 'Free' and 'Sequential' options)
- Show less...** (button)
