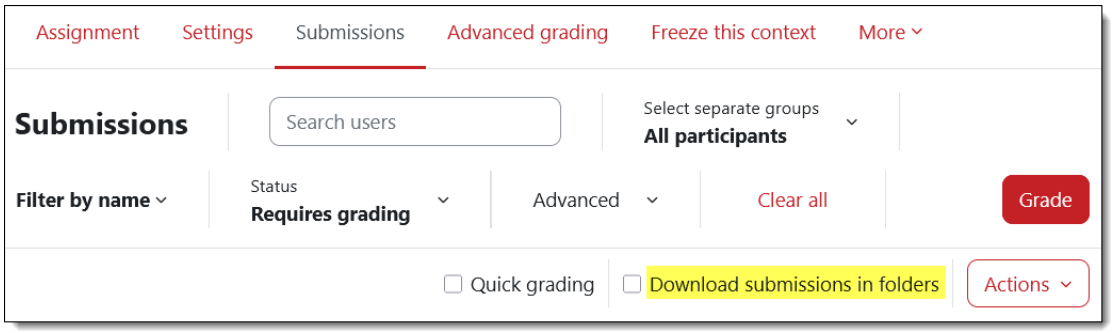
Faculty: Prevent Downloads in Individual Folders

Hart Wilson - 2025-12-18 - Comments (0) - Faculty

Has Moodle decided to download student assignment files in individual folders for you? There's a quick and easy fix for that!

1. Open the assignment link.
2. Click on the **Submissions** tab.
3. Deselect the **Download submissions in folders** option at the top of the submissions table.


That setting will remain your preference for other assignments.
