

Faculty: Prevent Downloads in Individual Folders

Hart Wilson - 2018-01-12 - Comments (0) - Faculty

Has Moodle decided to download student assignment files in individual folders for you? There's a quick and easy fix for that!

1. Open the assignment link.
2. Click on **View all submissions**.
3. Scroll to the bottom of the page and uncheck the box labeled **Download submissions in folders**.

That setting will remain your preference for other assignments.
