

Faculty: Release Grades on Specific Date

Hart Wilson - 2024-06-16 - Comments (0) - Faculty

Moodle makes it easy to hold assignment grades back until all grades have been assigned. You can use this feature for assignments, forums, and manually created gradebook items. Quiz score availability is controlled through [Review options](#).

Head's up: By default, hidden grades **are** included in student totals, so an individual student could calculate a score that has not yet been released.

1. With editing turned on in your course, open the gradebook and locate the activity.
2. Click on the **Edit** icon in the **Controls** cell at the top of the column.
3. Open the **Show more....** link.
4. Scroll down to the **Hidden until** option and check the **Enable** box.
5. Set the date and time that you want the scores to become available to students.
6. Scroll down and **Save changes**.

The image shows three panels from the Moodle gradebook interface. The top panel is the 'Controls' cell for 'Exercise #3', showing a gear icon in the top right corner. A red arrow points from this gear icon to the 'Show more...' link in the 'Grade item' settings panel. The 'Grade item' panel shows 'Exercise #1' as the item name, with a 'Show more...' link highlighted. The 'Parent category' is 'In-Class Assignments'. A red arrow points from the 'Show more...' link to the 'Hidden until' section in the 'Show less...' settings panel. The 'Hidden until' section has the 'Enable' checkbox checked, and the date and time are set to June 13, 2024, at 13:35. The 'Maximum grade' is set to 20.00.
