Faculty: Set Up a Hypothesis Link for Groups

Hart Wilson - 2026-11-20 - Comments (0) - Faculty

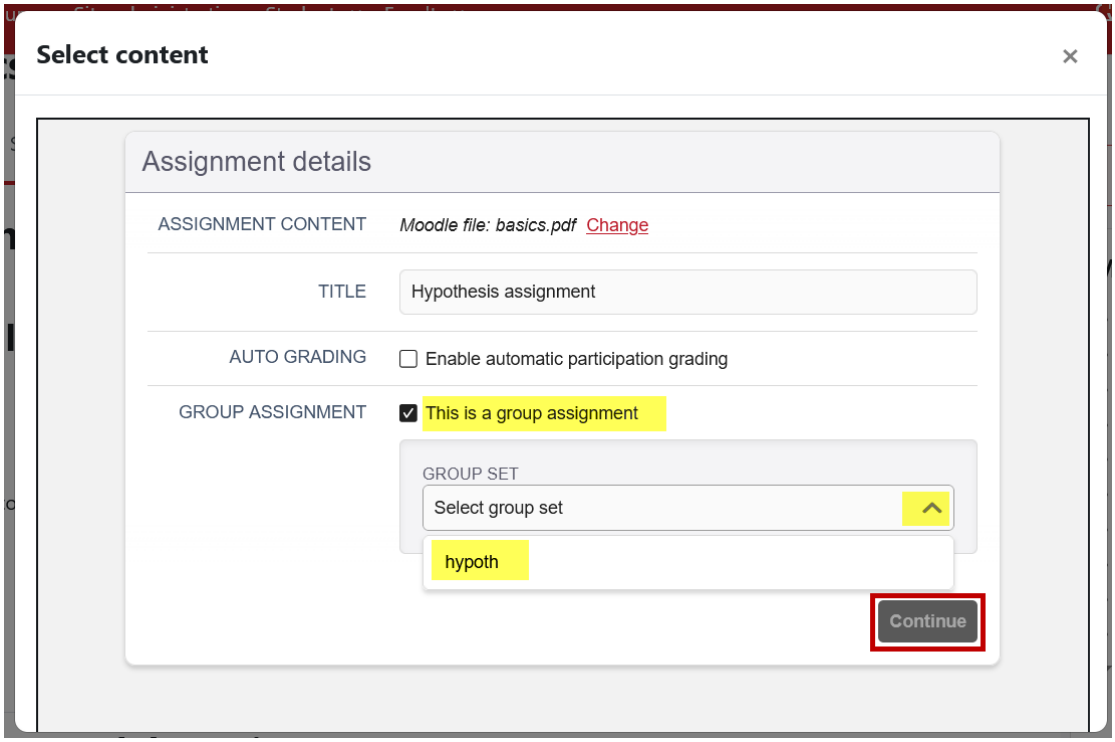

Setting up Hypothesis links for groups used to be a complex process, but now it's super easy!

Prepare Groups

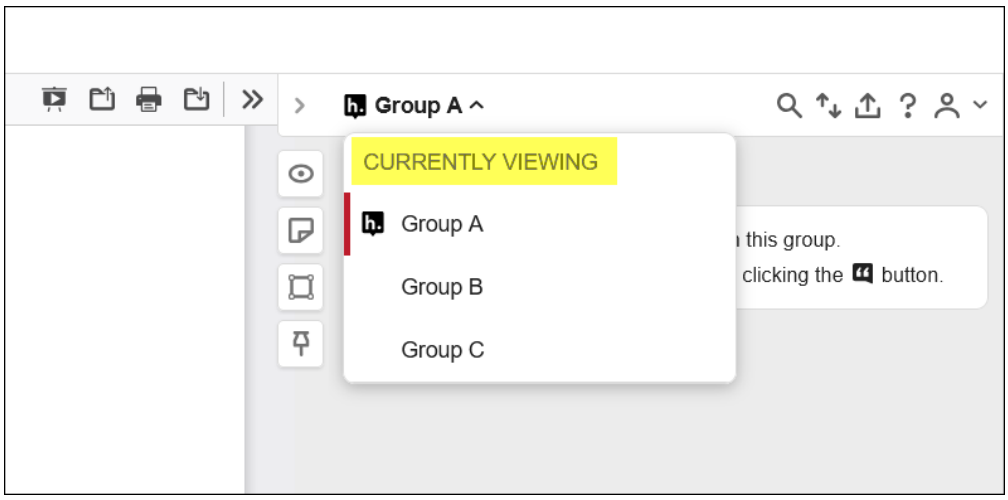

Follow these instructions for setting up groups. Once you've created groups and assigned users to them, create a grouping and assign your groups to it.

Set Up Hypothesis Activity

See these instructions for setting up a Hypothesis link. When you get to the last step in the process to select the file, check the box indicating **This a group assignment**. Open the **GROUP SET** menu and select the grouping that you created for your groups, then click on **Continue**.

When you open the Hypothesis link from the course main page, you'll be able to select each group to follow along with their annotations.
