

Faculty: Set Up a Hypothesis Link for Groups

Hart Wilson - 2026-06-01 - [Comments \(0\)](#) - [Faculty](#)

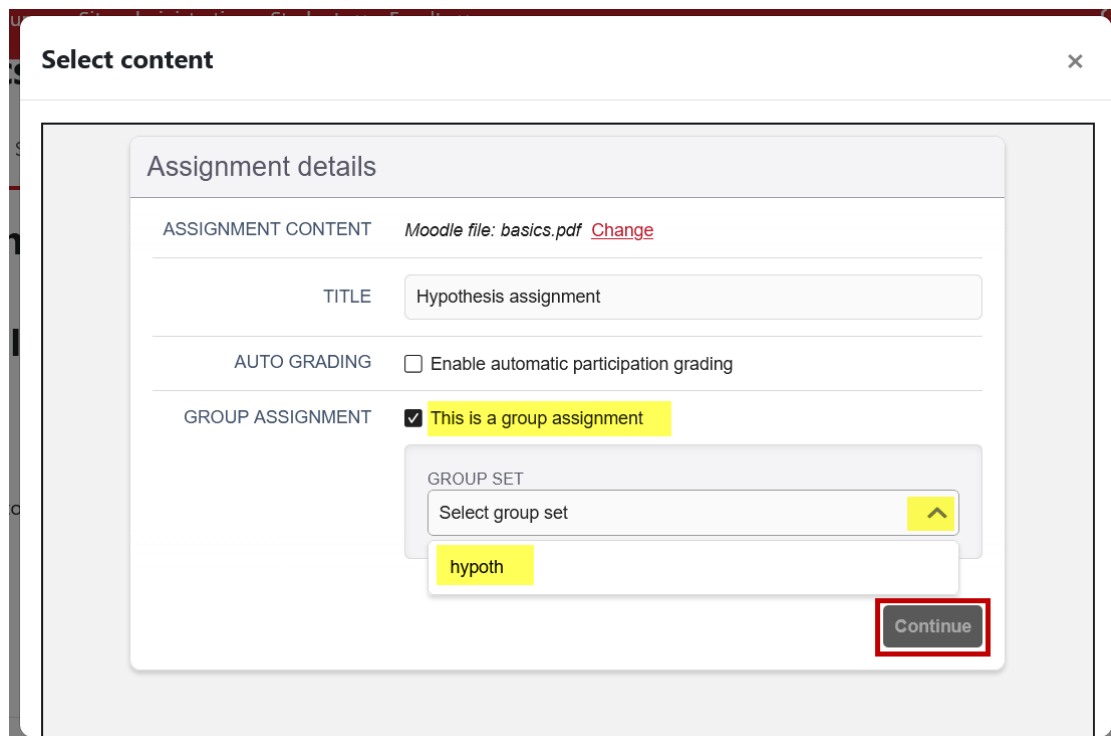

Setting up Hypothesis links for groups used to be a complex process, but now it's super easy!

Prepare Groups

Follow these instructions for [setting up groups](#). Once you've created groups and assigned users to them, [create a grouping](#) and assign your groups to it.

Set Up Hypothesis Activity

See these instructions for [setting up a Hypothesis link](#). When you get to the last step in the process to select the file, check the box indicating **This a group assignment**. Open the **GROUP SET** menu and select the grouping that you created for your groups, then click on **Continue**.

The screenshot shows a 'Select content' dialog box with the following fields and options:

- ASSIGNMENT CONTENT:** Moodle file: *basics.pdf* [Change](#)
- TITLE:** Hypothesis assignment
- AUTO GRADING:** Enable automatic participation grading
- GROUP ASSIGNMENT:** This is a group assignment
- GROUP SET:** Select group set (dropdown menu showing 'hypoht')
- Continue** button (highlighted with a red box)

When you open the Hypothesis link from the course main page, you'll be able to select each group to follow along with their annotations.
