Faculty: View and Grade Quizzes

Hart Wilson - 2018-10-16 - Comments (0) - Faculty

When you create a quiz (see guides to quizzes), a corresponding item is created in the grade book. Moodle will grade most question types as soon as a test is submitted and automatically enter the scores in the grade book. To view quiz results:

1. Click on the link for the test in the course main page. You'll see the test description and the total number of **attempts** that have been made.
2. Click on **Attempts: #** or click on the quiz admin gear, then **Grades** to view students' attempts.
