How do I complete a channel scan on a Digital TV?

Please note: All TV manufacturers differ, so menu options, wording and other items may vary. The best way to complete the channel scan is to refer to the TV owner's manual. If that is unavailable, the following general steps should guide you through the process.

1. Using your television's remote control, press the **Menu** or **Settings** option.
Note: a "Smart TV" may have a smart button that must be used to access the settings menu. It will generally have the manufacturer's logo on it.
2. Locate **Channels** or **Tuner Set Up** option.
3. Check the menu for an option of **Antenna Type** or **Connection Type** followed by either **Antenna** or **Cable**.
4. Make sure that the designated setting is **Cable** (based on manufacturer, alternate choices may include Digital Cable, CATV or Cable STD)
5. From the menu, choose **Channel Search** (based on manufacturer, alternate choices may include Channel Scan, Channel Search or Autoprogram.)
6. Allow the TV to complete the search. You will see a bar listing how many channels have been found. The process may take up to an hour.
7. Once complete, confirm the menu prompt, then press an exit or quit option.
