

How to Connect to SOU VDI on a Wyse Zero Client

David Raco - 2023-12-06 - [Comments \(0\)](#) - [Remote Access](#)

This article will show you how to connect to our VDI (Virtual Desktop Infrastructure) using a Wyse zero client, depicted below.

Step 1 - Enter the Server

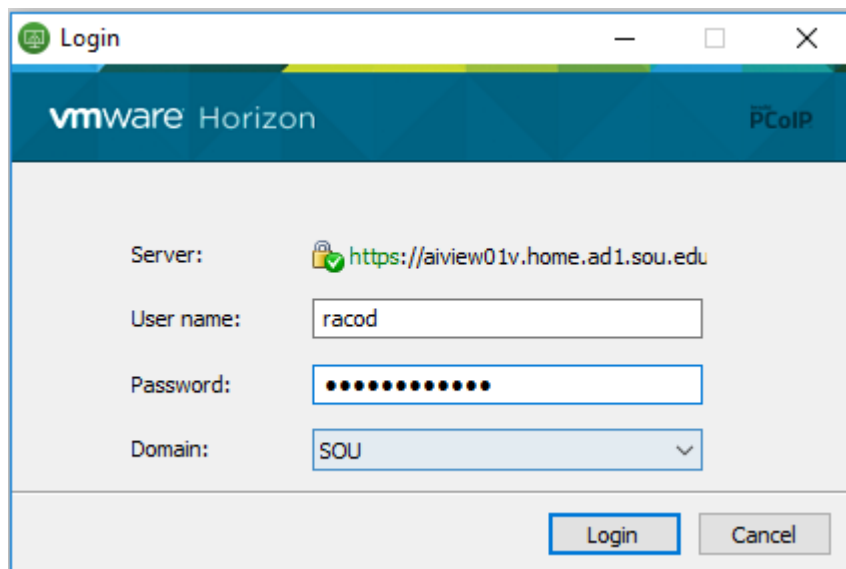

After turning on the zero client, you may be prompted to enter a server to connect to. If the zero client has been used before, it should remember the correct server string, but if you need to enter it, it is **aiview01v.home.ad1.sou.edu**.

(NOTE: Throughout this guide, the screenshots you will see will look slightly different from their sister prompts on the Wyse screen, but the procedure is identical.)

Step 2 - Enter Your Credentials

After the server has been specified, you will need to enter your SOU credentials (the same you use to log in to everything else). Be sure that the domain is set to SOU before you try to log in. If it says ROOT, just click the dropdown menu and change it to SOU.

A screenshot of the VMware Horizon login window. The window has a title bar with a green icon and the text "Login". Below the title bar is a blue header with the "vmware Horizon" logo on the left and "PCoIP" on the right. The main area is light gray and contains four fields: "Server:" with a green lock icon and the URL "https://aiview01v.home.ad1.sou.edu"; "User name:" with a text box containing "racod"; "Password:" with a text box containing ten black dots; and "Domain:" with a dropdown menu showing "SOU". At the bottom right are two buttons: "Login" and "Cancel".

Server:  https://aiview01v.home.ad1.sou.edu

User name:

Password:

Domain:

Login Cancel

Step 3 - Select the Virtual Computer to Launch

For most students, the correct virtual computer to launch will be **SOU-VDI-Win10**. If you have been assigned a different virtual computer, select it from the list and launch it instead. To launch any virtual computer, just double-click it or right-click and select Launch from the menu.

If you have trouble with any of these steps, consult your office coordinator or feel free to contact your department's [Computing Coordinator](#) directly.
