How to Connect to SOU VDI Through the Web

David Raco - 2023-12-06 - Comments (0) - Remote Access

This article will show you how to connect to SOU's VDI (Virtual Desktop Infrastructure) using your favorite web browser.

Step 1 - Navigate to https://view.sou.edu

When you get there, click on the **VMware Horizon HTML Access button**.

Step 3 - Connect to the Virtual Computer of Your Choice

Which virtual computers are available to you will depend on your role at the university and your present permissions. If you are missing a virtual computer that you believe you should have access to, contact your Computing Coordinator.

Click on the virtual computer's icon to connect to it. If you do not know which virtual computer to connect to, contact your Computing Coordinator for guidance.

Method 2: Log off from the VDI session

When you are returned to the screen where you can select another virtual computer, you can sign out by clicking on the **menu** icon near the VM Horizon logo and selecting **Log out**.
