

## How to Find Your Computer's Hostname

David Raco - 2021-02-16 - Comments (0) - Mac

This article will show you how to find your computer's hostname.

Windows

### Method 1: Using Windows Settings

Open up Windows Settings from the Start Menu by clicking on the gear icon.

Your computer's hostname is the "Device name" on the About screen. Please make a note of it.

Macintosh

Follow [Apple's recommended instructions for locating your computer's hostname](#).
