I see a trial prompt when I sign in to Acrobat DC on my computer

Jesse Martinich - 2025-06-27 - Comments (0) - Remote Access

When you install and launch Acrobat DC on a Windows computer and sign in, if you see a Try or Buy prompt, do the following:

1. Exit Acrobat DC, if it is running.
2. Download the [AcrobatStudentAccess.zip](#) file and extract it on your computer.
3. Right-click the included EXE file and choose **Run as Administrator**. (Click yes or enter your computer password, if prompted)
4. Start Acrobat DC. It should now launch without asking you to sign in.
