Installing Creative Cloud App for Mac and PC (Student)

Ulrich Sommerauer - 2021-02-02 - Comments (0) - Students

Installing Creative Cloud App for Mac and PC

Open the browser of your choice (Chrome, FireFox, Safari or Edge) and navigate to www.adobe.com

Use your SOU email (Not your private one, this is important)

After you successfully logged in, locate the Creative Cloud link and click it.

Click there, then download the App

I highly recommend only installing the Apps that you need … the entire suite takes up quite a chunk of your local storage.

As a student, the license will be good until the end of the term that you are enrolled in. If you do enroll in another course after that, that also has Adobe privileges, the license will simply continue.
