

Link to a Website from a Google Site

Hart Wilson - 2022-04-18 - Comments (0) - Google Apps

To embed a link to a website (or Google doc) in a Google site, begin by entering text related to the link you wish to create in a text box. Then follow these steps:

1. Select the relevant text.
2. Click on the **Insert link** icon in the editing toolbar.
3. Copy the URL and paste it in the field provided (use Ctrl+V to paste).
4. Click on **Apply**.
5. Follow the link to ensure that it works correctly.

Remember to publish your site to display your changes to visitors to your site.

The image shows a rich text editor interface. At the top, there is a toolbar with various icons: a dropdown menu set to "Normal text", bold (B), italic (I), bulleted list, numbered list, link (chain icon), unlink (trash icon), and a vertical ellipsis. Below the toolbar, the text "This is my fabulous essay." is displayed. A blue selection box highlights the underlined text. A blue line with circular endpoints at the start and end of the selection extends upwards to the link icon in the toolbar. A callout box with an orange border and a pointer to the link icon contains the text "5. Test link.". Below the text, a link insertion dialog box is open, showing a URL field with the text "https://drive.google.co...", a pencil icon for editing, and a trash icon for deleting the link.

Normal text **B** *I* [List Icons] [Link Icon] [Unlink Icon] [More Icon]

This is my fabulous essay.

5. Test link.
