

Students: Link to File from a Google Site

Hart Wilson - 2022-04-18 - Comments (0) - Students

You have options for including content from the web in your Google site.

Besides <u>inserting a file from your Google drive</u>, you can also link to a file (<u>or a website</u>) from your site.

Link to a File

- 1. First, set the share settings to your file so that anyone with the link can view it.
- 2. Then copy the shared link.
- 3. In your site, insert a textbox and enter text that is descriptive of the file's contents.
- 4. Select the related text and click on the **Insert link** icon in the toolbar.
- 5. Paste the copied link into the **Link** field.
- 6. Click on **Apply**.
