

Students: Record Audio or Video Response

Hart Wilson - 2024-10-14 - Comment (1) - Students

We're now able to record brief audio or video clips in Moodle textboxes. You can record up to two minutes in an audio or video file in any textbox that includes these tools.

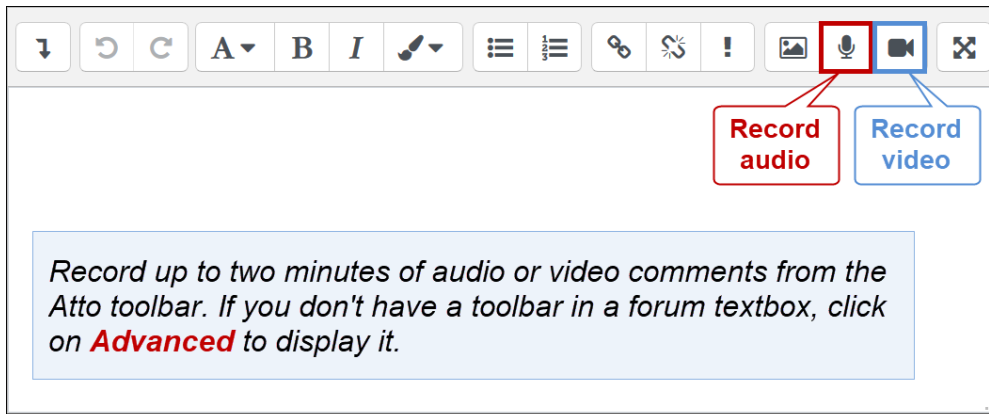

A screenshot of a Moodle post. On the left is a cartoon owl icon. To its right, the text reads "Post by Test Teacher" and "Re: Video". Below this is a video player interface with a play button, a volume icon, and the word "LIVE". At the bottom left of the post is a "Reply" button.

A screenshot of a Moodle post. On the left is a circular profile picture of a woman. To its right, the text reads "Post by Hart Wilson". Below this is a video recording of the same woman smiling. The video player has a play button, a volume icon, a progress bar, and a timestamp of "-0:05". At the bottom left of the post is a "Reply" button.

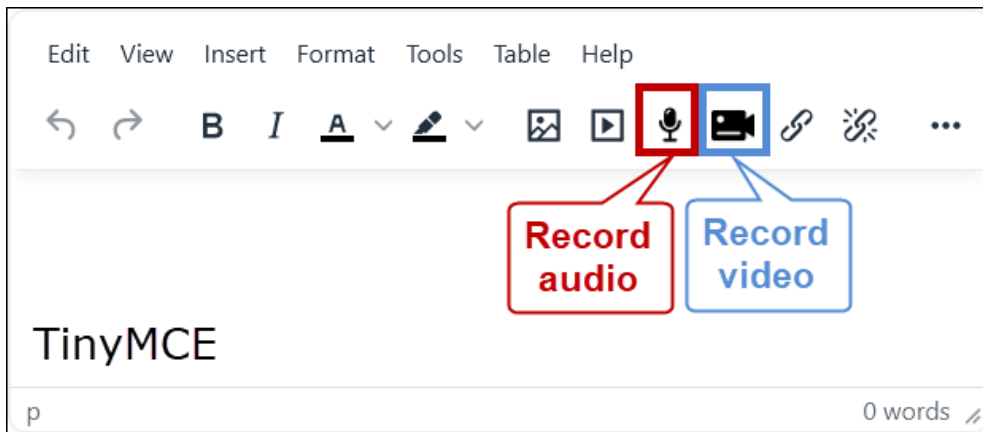

To create an audio or video recording of up to two minutes, open a textbox and click on the appropriate icon. Click on the **Start recording** button. When you're done speaking, click on **Stop recording**, then click on **Attach recording** or **Record again**, depending on how happy you are with the result.

This illustration shows the tools in the [Atto editor](#):

These

are the icons in the [TinyMCE editor](#):

Note:

In a discussion forum textbox, click on **Advanced** (beneath the textbox) to display the text editor if it is not already showing.
