Issues Accessing Google.com and other HTTPS websites -- 09/21/2022

2022-09-21 - David Raco - Comments (0) - General

UPDATE: This should be working again as of 9 AM. If you are still having problems, try restarting your web browser or reboot your computer. If that doesn't help, call our helpdesk at 541-552-6900.

We are aware of an issue that is preventing some users from accessing Google.com and some other HTTPS websites from devices managed by SOU. Affected persons may see a warning like the ones below. The issue is related to our endpoint security software and is affecting customers across the world. We are working to resolve this problem as soon as possible.

Access from personal devices is not affected, so if you have the means to access your email or Google via a personally owned mobile device, we recommend that as a workaround.
